Canton Movie 95

### Sound Test:

The surround sound is wonderful spacious and three-dimensional, without sounding washed out there. Thus, the wandering in the stereo and sound effects throughout the room can always be tracked precisely. In the bass range of active subwoofers supports sonic events with a powerful bass foundation.

### Conclusion:

The Canton Movie 95 offers a surprisingly high sound quality for the money. The bass is dynamic-powerful, the voice reproduction is excellent, the high tone range literally brilliant. So we can recommend the sonorous Canton set all home theater novices without exception.

## Canton Movie 95

Review

# screen heroes

► Sometimes small things that make a big difference. So also with the second smallest box set from the house of Canton. With a price of around 400 euros it promises a perfect introduction to the fascinating world of home cinema. Whether the sound quality while remaining on the track, AV magazine tested.

Who wants to perfect his native film and TV experience, can not get around a 5.1 speaker set. But

these can be very expensive and space-consuming. It therefore makes sense to resort to a small and inexpensive model. But how to find the right thing? Those who want to combine quantity and quality in a product and its budget would not unduly strained, can safely access the movie systems from Canton. The Hessian speaker specialist, has just created this series to offer clients a space-saving and attractively priced entry into the exciting

to enable world of home cinema. The Movie series currently has 14 different 5.1-sets that vary in price, size, and thus equipment. AV Magazine has one of the little baby of the family picked to test to test it with respect to its detailed qualities film and TVTon playback. Action!

### Up & Connectivity

When unpacking the handy satellite cube that vividly illustrated and well-structured manual first falls into their hands. Thanks to the understandable notation and the unique imaging proper commissioning for home theater novices without any problems. The small satellite speakers can either be placed or hung on a wall. The necessary mounting brackets are made of sturdy metal and laudably already included. The matching speaker stand is LS95, costs around 60 euros, and is optional to have in black, silver or white. The connecting cables for the speakers and subwoofer are not included and must be purchased optional. Who wants to experience the best possible surround sound, operates the satellite at ear level and points it directly at the listening position. The cable connection is via massive and gilded pressure clamps. These are in a sinking at the back of the boxes and take stranded on a cross-section of up to 1.5 square millimeters. Even for the center speaker sets Canton practical Wandmonta-

gewinkel at. The subwoofer can be placed outside the direct field of view. Here one should be avoided if possible, to position it in a corner or directly on the wall. By the resulting reflections there the bass loses then heard of precision and tonal linearity.

The workmanship is typical of Canton-notch. The high-quality plastic body is tired and overweight in hand, impresses with impeccable detail and a uniform color effect.

### Design and processing

The small satellite of the movie 95 sets fit easily with a height and width of each 9 centimeters into the living room one. Due to the small parking space requirements and the classy matt white boxes housing our test pattern you see the home theater components only at second glance. Thus, the compact boxes cubes can be operated virtually anywhere - on shelves, window sills, TV-boards or on the wall.

The gaps run very parallel, the grip surface of the satellite looks classy and quality. Also, the protective grille in the front sits firmly and precisely, which underlines the very positive tactile impression of this set. The gold-plated terminals on the back of the speaker are also stable and thus executed durable. The subwoofer is this in every way, like with a pragmatischsoliden housing construction and ansehnlichem finish.

### technology

In the bass range Canton uses a so-called bandpass subwoofer. Here, the 20-centimeter-tall cone woofer operates in a closed volume of air. The discharged back sound is passed over a large port tube to the outside. This type of housing tune the woofer experiences quasi a bass Turbo, as the compression effects that are used specifically for an increase in sound pressure in the bass range. To ensure a powerful bass response, also ensures a 120 watt mono amplifier payable for efficient signal amplification. In the small satellite cube a 80-millimeter Konustöner potters. In this case, it functions as a wide strip, of the frequency spectrum between about 150 to

5,000 Hertz transmits. With a display area of just over five octaves, the cone so promises a particularly good omnidirectional. The high frequency range is reproduced by a 15 mm small spherical cap, the befes- on a jetty

Untitled, towers over the center of the Konus`. Through this type Canton could effectively save space, so as to make the satellite speakers particularly compact. An exception is the wider center speaker, surround a tweeter in which two Konustöner. So a powerful rendition of the speech relevant center channel is achieved, which is particularly positive in the overall sound noticeable.

sound quality

For the listening test we put the fantasy adventure "Avatar" in the drive of the Blu-ray player. Here, the Movie 95 set from the first minutes of the game shows its proven acoustics. Film dialogues are reproduced thanks to the neutral tone 'with very good speech intelligibility. So sound female and male speaker voices really nice authentic. No trace of disturbing twang and lack of tone. This is not often the case of particularly compact satellite speakers. The atmospheric film music will also be played over the speakers sextet with flying colors. The surround sound is wonderful spacious and three-dimensional, without sounding washed out. Thus, the wandering in the stereo and sound effects throughout the room can always be tracked precisely. lower in the bass

the active subwoofer supports the aural event with a powerful bass. Thanks to its premier bandpass vote of the 20-bass can build an amazing printing capability even at elevated levels, without losing control of the acoustic event. All in all places the compact Movie 95 set in AV Magazine listening room a superb overall performance towards that eventually a well-deserved Price Tip Award results.
